

AURA presents
3rd Edition of

INFERENTIA

A 24hr National Level Hackathon

Team Details

Team Name:

SETU
College Name: NMAM Institute of Technology

City:

Mangalore

Track

MAKING ACCESS BETTER

- Simplifies access to essential government services
- Breaks language and digital barriers
- Enables OCR, multilingual, STT & TTS
- Turns rejection into clear, actionable steps

PROBLEM STATEMENT

Brief About the Idea

- Saral Sahayak turns a confusing government rejection into **clear, actionable steps**
- **Example:** “EPFO Claim Rejected – Name Mismatch” → **AI explains** what is wrong, what to correct, which document is needed, and how to resubmit
- Users can upload, scan, type, or speak — with **OCR, multilingual AI, STT & TTS**
- Goes beyond explanation by generating a **ready-to-use** appeal/resubmission draft
- EPFO alone settled **6.01 crore claims in FY 2024–25**, showing the massive scale of the service we aim to make easier

Novelty

Proposed Solution

Users upload, scan, type, or speak their rejection details.

User input submission

It explains the issue in simple, preferred language.

Clear explanation

Generates a ready-to-use resubmission or appeal draft.

Draft creation

AI extracts and identifies the specific rejection reason.

AI analysis

Provides a step-by-step fix with required documents and actions.

Actionable guidance

Guides users toward the appropriate grievance/escalation process when required.

Escalation support

Tech

Wirefram/Mock Diagram (optional)

THANK YOU!
